
COVERING ALL THE BASES

Assumptions and product opinions

Product → **Accumulator**

- Does the client want to minimize external collateral?
- Always maximize plus premium to maximize policy performance
- Life pay vs Limited pay: Does NCPI deduction matter?

Assumptions

- DSIR → Current minus 1.5% (Does it still make sense at current minus 2%?)
- Reinvestment rate → Client dependent (test range: from 0% to the loan rate)
- Loan Rate → Best practice is to test 5% to 6%
- Tax Rates → Client dependent (passive vs active investments?, small business?)

“ To Leverage or Not To Leverage ”
